DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. SAUNDERS, STEVEN on September 22, 2003. The application has been amended as follows:

Please cancel claims 12 and 26.

Allowable Subject Matter

2. Claims 1-11 and 13-25 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: claims 1 and 13 recites, inter alia, "a coupler circuit for sampling an output power of a signal from an output power source that delivers the signal to a load, where an output matching network is coupled between the output power source and the load, the coupler circuit comprising at least one first and second sampling elements coupled to an output of the output matching network for sampling the first and second portion of the signals; and a processor coupled to the at least one first and second sampling elements for determining the output power based at least on the first portion of the signal and the

second portion of the signal." The above limitations give the power measurement more accurate, however, only if the load impedance is the same as the sample impedance. When the load impedance varies, errors will occur in the power measurement.

The art of record does not disclose the above limitations, nor would it be obvious to modify the art of record so as to include the above limitations. Although Turski et al. (U.S. 6,600,307) disclose a method and apparatus for measuring true transmitted power using a broadband dual directional coupler and 5,857,039 et al. (U.S. 5,857,039) disclose a mixed silica/polymer active directional coupler, in integrated optics, they do not disclose the above-mentioned limitations.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
